

# Education at a Glance 2022

OECD Indicators

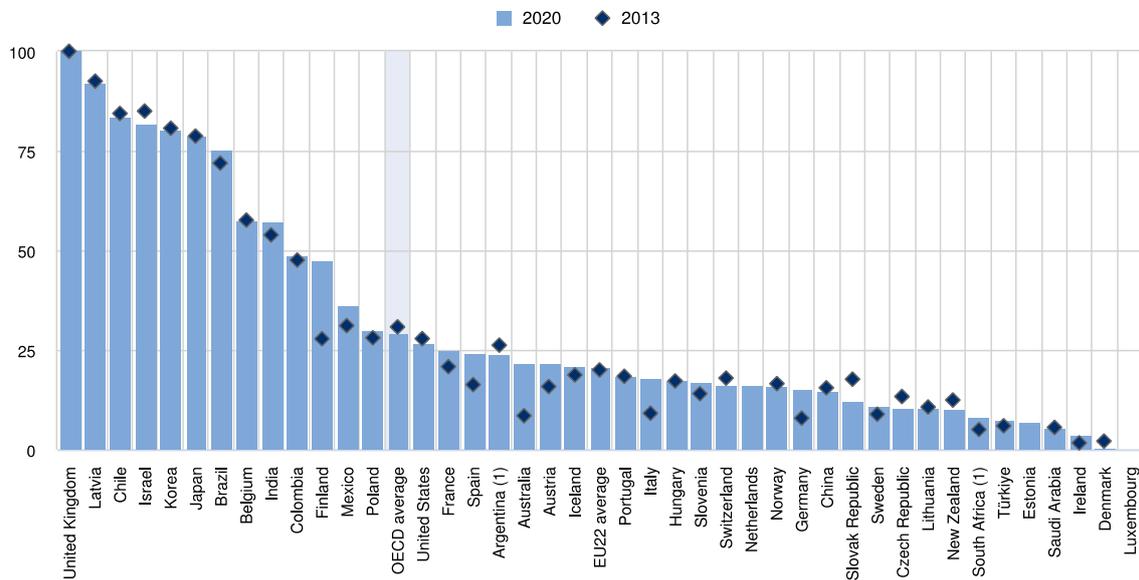

# Saudi Arabia

## Access to education, participation and progress

- Compulsory education begins at the age of 6 and ends at the age of 14 in Saudi Arabia. The range of ages for which at least 90% of the population are enrolled is longer than the period of compulsory education and goes from the age of 7 to the age of 17. This is similar to most OECD countries, where more than 90% of the population are also enrolled for longer than the period of compulsory education.
- In Saudi Arabia, the large majority of tertiary students (95%) are enrolled in public educational institutions (OECD average: 71%), while only a small portion are enrolled in private institutions (5%). The share of tertiary students enrolled in private institutions in Saudi Arabia remained the same between 2013 and 2020 (Figure 1).
- Enrolment rates are lower among the population aged 25 and above. In Saudi Arabia, 12% of the 25-29 year-olds (at the same level as the OECD average) and 1% of 30-39 year-olds were enrolled in tertiary education in 2020.
- In 2020, foreign students represented 4% of all tertiary students in Saudi Arabia, 1 percentage point below the value in 2015 and 3 percentage points below the OECD total in 2020. In Saudi Arabia, 43% of foreign students enrolled in tertiary education comes from neighbouring countries.

Figure 1. Share of tertiary students in private institutions (2013, 2020)

In per cent

1. Year of reference 2019.

Countries are ranked in descending order of the share of tertiary students enrolled in private institutions in 2020.

#### 4 | SAUDI ARABIA- COUNTRY NOTE

Data on subnational regions for selected indicators are available in the *OECD Regional Statistics* (database) (OECD, 2022). When interpreting the results on subnational entities, readers should take into account that the population size of subnational entities can vary widely within countries. For example, regional variation in enrolment may be influenced by students attending school in a different region from their area of residence, particularly at higher levels of education. Also, regional disparities tend to be higher when more subnational entities are used in the analysis.

Explore, compare and visualise more data and analysis using the Education GPS:

<https://gpseducation.oecd.org/>

The data on educational responses during COVID-19 were collected and processed by the OECD based on the Joint Survey on National Responses to COVID-19 School Closures, a collaborative effort conducted by the United Nations Educational, Scientific and Cultural Organization (UNESCO); the UNESCO Institute for Statistics (UIS); the United Nations Children's Fund (UNICEF); the World Bank; and the OECD.
