

Important note regarding Greece

The data for Greece include a large number of cases (1 032) in which there are responses to the background questionnaire but where responses to the assessment are missing. Proficiency scores have been estimated for these respondents based on their responses to the background questionnaire and the population model used to estimate plausible values for responses missing by design derived from the remaining 3 893 cases.

More details can be found in the Technical Report of the Survey of Adult Skills, Third Edition (OECD, 2019).
